ARTICLES

Elhadi Shakshuki, Kumaraswamy Ponnambalam, and Tassew Wodaj	Risk analysis in environmental systems	1
Jeannette Montufar and Alan Clayton	Seasonal weight limits on prairie region highways: opportunities for rationalization and harmonization	8
J.A. Brereton and D.S. Mavinic	Field and material-specific simulated distribution system testing as aids to understanding trihalomethane formation in distribution systems	17
Marc Savard, Marc-André Careau, and Alain Drouin	Experimental study on the dynamic effects caused by vehicular traffic on a ferry boarding ramp	27
A. Voisin and R.D. Townsend	Model testing of submerged vanes in strongly curved narrow channel bends	37
Guy Doré, Martin Flamand, and Pierre Pascale	Analysis of the wavelength content of the longitudinal profiles for C-LTPP test sections	50
N. Banthia and H. Armelin	A novel double anchored steel fiber for shotcrete	58
J. Blackburn and F.E. Hicks	Combined flood routing and flood level forecasting	64
Mehdi Setareh	Floor vibration control using semi-active tuned mass dampers	76
Md. Rabiul Alam and A.S.J. Swamidias	A non-destructive crack detection method for steel jacket offshore platforms based on global and local responses	85
B.J. Schmidt and F.M. Bartlett	Review of resistance factor for steel: data collection	98
B.J. Schmidt and F.M. Bartlett	Review of resistance factor for steel: resistance distributions and resistance factor calibration	109
Patrick Paultre and Caroline Moisan	Distribution of moments in reinforced concrete slabs with continuous drop panels	119
John Newhook, Amin Ghali, and Gamil Tadros	Concrete flexural members reinforced with fiber reinforced polymer: design for cracking and deformability	125
Ahmed Shalaby	Modelling short-term aging of asphalt binders using the rolling thin film oven test	135
H. Chanson and L. Toombes	Experimental investigations of air entrainment in transition and skimming flows down a stepped chute	145
Mahmoud Rezaei and Carlos E. Ventura	Analysis of strong and weak ground motions recorded at two sites during Loma Prieta earthquake by wavelet transform	157
Byung-Wan Jo, Yunn-Ju Byun, and Ghi-Ho Tae	Structural behavior of cable anchorage zones in prestressed concrete cable-stayed bridge	171
NOTE		
Shi-Jun Zhou	Load-induced stiffness matrix of plates	181
DISCUSSIONS		
David Hansen and J.A. Kells	Environmental engineering education in Canada: Discussion	185
D.W. Smith and N. Biswas	Environmental engineering education in Canada: Reply	188

April / avril

ARTICLES

- M. Alavi-Fard and H. Marzouk** Bond behavior of high strength concrete under reversed pull-out cyclic loading 191
- A. El Amri et J.L. Verrette** Étude quantitative de l'érosion en aval des dissipateurs d'énergie type auge 201
- R. Balachandar, K. Hagel, and D. Blakely** Velocity distribution in decelerating flow over rough surfaces 211
- Michael V. Seica, Jeffrey A. Packer, M.W.F. Grabinsky, and Barry J. Adams** Evaluation of the properties of Toronto iron water mains and surrounding soil 222
- Aftab A. Mufti and Baidar Bakht** Fazlur Khan (1929–1982): reflections on his life and works 238
- Gérard Ballivy, Patrice Rivard, Caroline Pépin, Marc G. Tanguay, and Alexandre Dion** Damages to residential buildings related to pyritic rockfills: field results of an investigation on the south shore of Montreal, Quebec, Canada 246
- R. Balachandar, D. Blakely, and J. Bugg** Friction velocity and power law velocity profile in smooth and rough shallow open channel flows 256
- Sou-Sen Leu and Tzung-Heng Hung** An optimal construction resource leveling scheduling simulation model 267
- Yasser Hassan and Tarek Sayed** Effect of driver and road characteristics on required preview sight distance 276
- Marc-André Bérubé, Dominique Chouinard, Michel Pigeon, Jean Frenette, Luc Boisvert, and Michel Rivest** Effectiveness of sealers in counteracting alkali–silica reaction in plain and air-entrained laboratory concretes exposed to wetting and drying, freezing and thawing, and salt water 289
- Sameh R. Salib, George Abdel-Sayed, and Nabil Grace** An analytical approach towards determining the strength of FRP-reinforced/prestressed concrete beams 301
- Y. Shammaa, D.Z. Zhu, L.L. Gyürék, and C.W. Labatiuk** Effectiveness of dry ponds for stormwater total suspended solids removal 316
- Ardeshir Faghri and Khaled Hamad** Travel time, speed, and delay analysis using an integrated GIS/GPS system 325
- Marc-André Bérubé, Dominique Chouinard, Michel Pigeon, Jean Frenette, Michel Rivest, and Daniel Vézina** Effectiveness of sealers in counteracting alkali–silica reaction in highway median barriers exposed to wetting and drying, freezing and thawing, and deicing salt 329

NOTE

- Brahim Benmokrane, Burong Zhang, Kader Laoubi, Brahim Tighiouart, and Isabelle Lord** Mechanical and bond properties of new generation of carbon fibre reinforced polymer reinforcing bars for concrete structures 338

BOOK REVIEW / CRITIQUE DE LIVRE

- M. Hesham El Naggar** Fundamentals of engineering numerical analysis *by* Parviz Moin 344

June / juin

ARTICLES

- Bruno Fiorio, Jacques Meyssonier, and Marc Boulon** Experimental study of the friction of ice over concrete under simplified ice–structure interaction conditions 347
- Daniel Perraton, Alan Carter, Michel Vaillancourt et Bruno Lavoie** Perméabilité in situ du béton de peau, établie à partir de la percolation d'un gaz en régime d'écoulement permanent 360
- Nii O. Attoh-Okine** Probabilistic analysis of factors affecting highway construction costs: a belief network approach 369
- Ahmet Baylar and M. Emin Emiroglu** The effect of sharp-crested weir shape on air entrainment 375
- Y.H. Chui and Steven Craft** Fastener head pull-through resistance of plywood and oriented strand board 384
- Marjan Popovski, Helmut G.L. Prion, and Erol Karacabeyli** Seismic performance of connections in heavy timber construction 389
- E.C. Carriveau, R.E. Baddour, and G.A. Kopp** The entrainment envelope of dye-core vortices at submerged hydraulic intakes 400
- X.Q. Zhang, P.W.M. Tam, and W. Zheng** Construction, operation, and maintenance of rubber dams 409
- Y. Cengiz Toklu** Application of genetic algorithms to construction scheduling with or without resource constraints 421
- Yongcong Ding, Kalid S. Jaboo, Yean Sun, and Murty K.S. Madugula** Experimental basis for the effective length factors of steel solid round cross-braced diagonals in CSA Standard S37-01 430
- Y. Yang, A.G. Straatman, R.J. Martinuzzi, and E.K. Yanful** A study of laminar flow in low aspect ratio lid-driven cavities 436
- Nove Naumoski, Moe S. Cheung, and Simon Foo** Dynamic characteristics of the Confederation Bridge 448

Young-Suk Kim and Carl T. Haas A man-machine balanced rapid object model for automation of pavement crack sealing and maintenance	459
Jean-François Bruneau, Denis Morin et Marcel Pouliot Efficacité du pré-signallement d'arrêt scolaire avec feux jaunes et avec feux de détresse	475
Ario Ceccotti and Erol Karacabeyli Validation of seismic design parameters for wood-frame shearwall systems	484
Asad Udaipurwala and Alan D. Russell Computer-assisted construction methods knowledge management and selection	499
Mohamed Marzouk and Osama Moselhi Bid preparation for earthmoving operations	517

NOTE

Bill Bobey, Azita Azarnejad, Ken McWhinnie, and Robert Loov Composite girder design by CAN/CSA S6-00: generalized design equations	533

BOOK REVIEWS / CRITIQUES DE LIVRES

Clarence W. de Silva Identification and control of mechanical systems <i>by</i> J.N. Juang and M.Q. Phan	537
N.K. Srivastava Deployable structures, analysis and design <i>by</i> C.J. Gantes	538

August / août

ARTICLES

A. Osman Akan Modified rational method for sizing infiltration structures	539
Hasnaa Jorio, Guy Viel et Michèle Heitz Biofiltration de l'air pollué par le xylène : observations expérimentales	543
Andre Filiatrault, David Fischer, Bryan Folz, and Chia-Ming Uang Experimental parametric study on the in-plane stiffness of wood diaphragms	554
M.M. Reda Taha, X. Xiao, J. Yi, and N.G. Shrive Evaluation of flexural fracture toughness for quasi-brittle structural materials using a simple test method	567
Ying-Haur Lee, Ying-Ming Lee, and Shao-Tang Yen Corner loading and curling stress analysis for concrete pavements — an alternative approach	576
K.J. Kim, K.H. Chin, Seung H. Han, S.K. Woo, and Moon-young Cho Contractor integrated technical information service in construction	589
Ehab F. El-Salakawy, Maria Anna Polak, and Khaled A. Soudki Rehabilitation of reinforced concrete slab-column connections	602
Éric Mainville, Vincent Gauthier, Daniel Lavallée et Claude Marche Nouvelle approche pour déterminer la distribution des temps de séjour dans les réservoirs d'eau potable en régime non permanent	612

NOTE

Peter Lee, Ying H. Chui, Ian Smith, Noel Mailvaganam, and Gerry Pernica Prediction of early age curling in thin concrete topping over wood floor systems	622
---	------------

DISCUSSIONS

D.M. Moses Design method for bolted connections loaded perpendicular-to-grain: Discussion	627
P. Quenneville and M. Mohammad Design method for bolted connections loaded perpendicular-to-grain: Reply	629

BOOK REVIEWS / CRITIQUES DE LIVRES

Michael C. Quick Coastal processes with engineering applications <i>by</i> R.G. Dean and R.A. Dalrymple	631
Edward G. Nawy Concrete structures: stresses and deformations <i>edited by</i> A. Ghali, R. Favre, and M. Elbadry	633
Willi H. Hager The hydraulics of stepped chutes and spillways <i>by</i> Hubert Chanson	634

October / octobre

ARTICLES

Wuben Luo and Eric Weiss Evaluation of standard error of forecast of runoff volume using linear regression models	635
Magdy Samaan, Khaled Sennah, and John B. Kennedy Positioning of bearings for curved continuous spread-box girder bridges	641

S.M. AbouRizk, G.M. Babey, and G. Karumanasseri Estimating the cost of capital projects: an empirical study of accuracy levels for municipal government projects	653
Adel H. Salem, Mohamed A. El-Aghoury, Ezzeldin Y. Sayed-Ahmed, and Tarek S. Moustafa Composite steel-free deck bridges: Numerical modelling and pilot parametric study	662
Ahmed Shalaby and Alan Reggin Surface rutting of thin pavements and gravel roads under standard and reduced tire inflation pressures	679
Predrag Prodanovic and Slobodan P. Simonovic Comparison of fuzzy set ranking methods for implementation in water resources decision-making	692
Amer S. Shalaby A simplified approach for the historical analysis of urban person travel	702
Nicolas Richard, Laurent Daudeville, Helmut Prion, and Frank Lam Timber shear walls with large openings: experimental and numerical prediction of the structural behaviour	713
Klavs Feilberg Hansen Mechanical properties of self-tapping screws and nails in wood	725
Patrick L. Grover, Donald H. Burn, and Juraj M. Cunderlik A comparison of index flood estimation procedures for ungauged catchments	734
Giuseppe Campione The effects of fibers on the confinement models for concrete columns	742
S. Tighe, M. Knight, D. Papoutsis, V. Rodriguez, and C. Walker User cost savings in eliminating pavement excavations through employing trenchless technologies	751
Pedro de Almeida Manso and Anton J. Schleiss Stability of concrete macro-roughness linings for overflow protection of earth embankment dams	762
Steven R. Fox and Reinhold M. Schuster Strength of wind load bearing wall stud-to-track connections	777
Jack Q. Zhao, Lyne Daigle, and Denis Beaulieu Effect of joint contamination on the quality of butt-fused high-density polyethylene (HDPE) pipe joints	787
M.S. Cheung and W.C. Li Reliability assessment in highway bridge design	799
BOOK REVIEW / CRITIQUE DE LIVRE	
Raghavan Jayaraman Book review: Modeling in materials processing <i>by</i> Jonathan A. Dantzig and Charles L. Tucker III	806
December / décembre	
ARTICLES	
H. Chanson, Y. Yasuda, and I. Ohtsu Flow resistance in skimming flows in stepped spillways and its modelling	809
Heon-Soo Chung, Keun-Hyeok Yang, Young-Ho Lee, and Hee-Chang Eun Strength and ductility of laterally confined concrete columns	820
Ammar Hassan, Makoto Kawakami, Kyoji Niitani, and Tamio Yoshioka An experimental investigation of steel-free deck slabs	831
Abishai Polus and Moshe A. Pollatschek Stochastic nature of freeway capacity and its estimation	842
J. Alberto Escobar, A. Roberto Sánchez-Ramírez, and Juan N. Dyer Study of the bending hysteretic behaviour of ductile steel plates for seismic energy dissipation	853
Mohamed E. Ismail and Hamid R. Soleymani Monitoring corrosion rate for ordinary portland concrete (OPC) and high-performance concrete (HPC) specimens subjected to chloride attack	863
Claude Marche et Musandji Fuamba Observation et prédiction d'une brèche de rupture dans une digue submergée	875
Mehmet Ali Kökpınar and Mustafa Göğüş High-speed jet flows over spillway aerators	885
Mario Haché, Taha B.M.J. Ouarda, Pierre Bruneau et Bernard Bobée Estimation régionale par la méthode de l'analyse canonique des corrélations : comparaison des types de variables hydrologiques	899
Craig Giaccio, Riadh Al-Mahaidi, and Geoff Taplin Experimental study on the effect of flange geometry on the shear strength of reinforced concrete T-beams subjected to concentrated loads	911
BOOK REVIEW / CRITIQUE DE LIVRE	
Sheng S. Li Book review: Computational Fluid Dynamics <i>by</i> T.J. Chung	919
